Dear Hiring Manager,

16th August 2025

Currently, I'm working at **WIPRO LTD as a Senior Software Engineer, seeking better career opportunities to enhance my skills and grow professionally.** I've gained valuable client-side experience working with clients in Malaysia and Indonesia for over a year, broadening my understanding of diverse business needs and cultural dynamics.

I am a Backend Developer seeking employment for the software development using Java Spring Framework.

I have **7.5+** years of experience to building Full-Stack Web Applications and RESTful API's using Java EE and frameworks including Spring MVC and Spring Boot in product-based company.

I am proficient with relational databases such as PostgreSQL, SQL Server, and SQLite. I have a strong understanding of fundamental concepts like Object Oriented Programming, MVC Architecture, REST, and Test-Driven Development as well as experience building software with more modern techniques like third party API integration for Insurance industry to create policy digitally with microservice implementations like Symbiosys sales tool, Symbiosys sales Illustration, Symbiosys e-Application and Symbiosys Auto Underwriting.

As a team member, I bring strong git workflow practices and experience using agile methodologies to build software in a collaborative environment.

Before making a career change, I worked with product-based company C2L Biz Solutions Pvt Ltd where I was responsible for all phases of a project including working with clients on design and delivering a finished product on time.

I love the excitement of working in a fast paced environment and am very adaptable to change.

As a candidate, I possess the skills necessary to make meaningful contributions upon joining a team.

Thank you for considering my application and I look forward to hearing from you.

Best Regards,
Amitkumar Mahto
